

#301 was Discontinued the Production

G.S. #302 nano3

Our first power cable which was soaked with nano-sized Gold & Silver Micro Particles

- [Power Cable]
- model No. : GSC-32
 - Conductors : ϕ 0.26mm X 64-strings \cdot OFC [X3-st.]
Sectional Area : 3.398mm² / 1-strand [X3-st.]
 - Coloidal Liquid : Gold:80% \cdot Silver:20%
3-times High Density [Compared with #301]
 - Isolator Material : Audio Grade PVC [RoHS Conformed]
 - Outer Diameter : ϕ 11.2mm
 - Safety Regulation : PSE/UL/CSA/VDE, etc.
 - Usable Voltage : 100-250V/AC 50-60Hz
 - Terminated with AC Plugs Type [U.S. type & EURO type] are available
 - *Specifications may be changed without prior notice.

G.S.#302 nano3 Sectional Drawing

#307 EXTREME Sectional Drawing

G.S.#305nano3 Bulk was discontinued

#307 EXTREME New

●#307 EX. with CONDUCTIVE-PVC and Gold/Silver nano Coloidal Liquid made the Sound, so Smooth & Deep.

- ① : model : PS307
- ② : Conductor : ϕ 0.26mm X 104-Strings \cdot High Quality OFC [X3-Strands]
Sectional Area : 5.522mm² [X3-Strands]
- ③ : Coloidal Liquid : 80% Gold \cdot 20% Silver : 3-times High Density
- ④ : Isolator : Audio Grade PVC + Electro-Magnetic Wave Absorbing Material Mixed PVC [RoHS approved]
- ⑤ : Outer Dia. 12.7mm ⑥ Outer Sheath Color : Violet
- ⑦ : Safety Regulation Approved : PSE
- ⑧ : Release : 2014 August

●For the Cable Materials, Isolator is very important as much as the Conductor. This P.S.#307 uses Electro-Magnetic Wave Absorbing Material for Outer Sheath. This Material makes absorbing the Radiated Electro-Magnetic Wave from the Electric Current of the Conductor, as much as Noise coming from the outside that is very harmful for the Purity of the Electric Current.

POWER STRADA 7 PRO

●This POWER STRADA 7 PRO is upper version of POWER STRADA 3 PRO using Power Strada #307 Cable & New Female Connector.

POWER STRADA 2J NEW

POWER STRADA 2J NEW

- CABLE : G.S.#302nano3
- MALE PLUG : AET[PSE-18HG2(G)]
- FEMALE PLUG : FURUTECH[FI-15(G)PLUS]
- COLLOIDAL LIQUID : 80%:GOLD \cdot 20%:SILVER

POWER STRADA #308 is ALSO recommendable as SPEAKER CABLE "VERY MUCH".

POWER STRADA #308 New

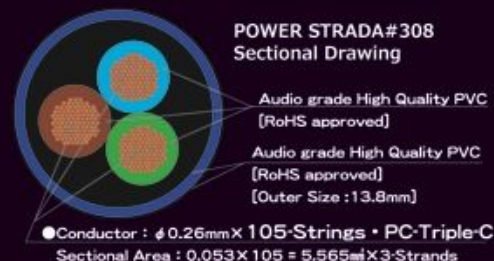

Our First Power Cable with PC-Triple C Conductor soaked with Gold/Silver nano Coloidal Liquid

- ① : model : PS308
- ② : Conductor : ϕ 0.26mm X 105-Strings \cdot PC-Triple C [X3-Strands]
Sectional Area : 5.565mm² [X3-Strands]
- ③ : Coloidal Liquid : 95% Gold \cdot 5% Silver : 1.5-times High Density
- ④ : Isolator : Audio Grade PVC [RoHS approved]
- ⑤ : Outer Dia. 13.8mm ⑥ Outer Sheath Color : Dark Blue
- ⑦ : Safety Regulation Approved : PSE
- ⑧ : Release : 2014 September

●High Quality Cables require High Grade Terminals. We choosed world acknowledged FURUTECH's FI-50-series for these new Terminated Power Cables.

You can select from Japan/U.S.A. Plug type [8J] & Euro [Schuko] type [8E] Male Plug set.

●After the PC-OCC Process was discontinued a group of the Engineers who were the Main persons of the development of the PC-OCC Process started to develop new Process for Better Quality Conductor. [PC-Triple C] is the new name of the Conductor, which uses FORGE process which is well-known for High Quality Auto Wheels. This New Process realized the Pure Copper Crystals more dense & tight, also makes the array of the Copper Crystals towards the Axis of the Electric Current. The result of the Combination of [PC-Triple C] & our Original Coloidal Liquid Process realized the Ideal Noise-less, Smooth Electric Current for Audio/Visual Components.
